Atlantic Tin Commits to International Tin Association's “Tin Code” Sustainability Standard

Atlantic Tin is proud to announce its commitment to adopting the International Tin Association’s (ITA) Tin Code sustainability standard for the Achmmach Tin Project in Morocco. This decision underscores Atlantic Tin's dedication to responsible and sustainable tin production, reflecting its ongoing efforts to align with global expectations on environmental, social, and governance (ESG) principles.

The ITA’s Tin Code is a comprehensive framework designed to ensure that tin production adheres to the highest standards of sustainability, responsible practices, and socio-environmental stewardship. By committing to this code, Atlantic Tin aims to enhance transparency and foster positive impacts on the communities and ecosystems where it operates.

“We are excited to take this significant step towards a more sustainable future,” said Simon Milroy, CEO of Atlantic Tin. “Adopting the Tin Code not only strengthens our commitment to sustainable practices but also demonstrates our dedication to leading the industry in environmental responsibility and ethical conduct as we transition in to production.”

Key aspects of the Tin Code that Atlantic Tin will implement include:

- **Responsible Sourcing:** Ensuring that all tin is produced responsibly, with rigorous due diligence to manage risks of human rights abuses and environmental degradation.
- **Environmental Management:** Reducing negative environmental impact through best practices in waste management, energy efficiency, and biodiversity conservation.
- **Social Responsibility:** Promoting fair labour practices, community engagement, and socio-economic development in mining regions where we operate.
- **Transparency and Accountability:** Effective and transparent ESG reporting to provide stakeholders with clear and accurate information about our sustainability efforts.

This commitment is part of Atlantic Tin's broader strategy to integrate sustainable development goals into its core operations and contribute positively to the global tin supply chain. By aligning with the ITA’s Tin Code, Atlantic Tin also supports the collective movement towards a more sustainable and equitable future for the tin industry.

About Atlantic Tin Limited

Atlantic Tin is a tin-focused mineral exploration and development company. Through its Achmmach Tin Project, Atlantic Tin controls one of the highest grade and largest new sources of tin supply globally, and one of the few sources of large-scale mechanised tin production in a low-risk jurisdiction.

The Company (75%) and its Joint Venture partners, Toyota Tsusho Corp (20%) and Nittetsu Mining Co (5%), are advancing the Achmmach tin project towards production in the Kingdom of Morocco.

About the International Tin Association

The International Tin Association (ITA) is the leading authority on tin research and development, promoting the responsible production and use of tin globally. The ITA's Tin Code provides a robust framework for sustainability in the tin industry, guiding companies towards best practices in environmental, social, and governance aspects.
